NUCLEAR INSTRUMENTS & METHODS

A JOURNAL ON ACCELERATORS, INSTRUMENTATION AND TECHNIQUES IN NUCLEAR PHYSICS

EDITOR: K. SIEGBAHN – UPPSALA

[v.40,no.3]

MASTER INDEX

VOLUMES 31-40

LAST ISSUE OF VOLUME 40

QC 788
N883

NOV 29 1966

NORTH-HOLLAND PUBLISHING COMPANY — AMSTERDAM

AUTHOR INDEX

Abbattista, N., V.L.Plantamura and M. Coli, Operative definition of the threshold of tunnel diode switching circuits 37 ('65) 323
Abu El-Ela, M., see Hamouda 40 ('66) 153
Aceto, H., see Raju 37 ('65) 152
Ádám, A., Gy.Kozma and P.Quittner, On angular correlation measurements between fast neutrons 37 ('65) 98
Adams, J.M., E.Barnard, A.T.G.Ferguson, W.R.McMurray and I.J.Van Heerden, A low threshold neutron detector for nanosecond time of flight spectrometry 34 ('65) 21
Af Ugglas, M., Preparation of silver and gold photoelectric strip-converters for use in beta spectroscopy 33 ('65) 335
Agarwal, V.K. and N.K.Gilra, Crystal density in supercooled radiation detector 40 ('66) 238
Aitken, J.H., see Borbas 37 ('65) 183
Aitken, Th.W., An ionization current integrator and its application to the measurement of the energy dependence of the Cornell thick-walled ionization chamber 34 ('65) 160
Alberigi Quaranta, A., G.Casadei, M. Martini, G.Ottaviani and G.Zanarini, On the information available from the rise-time of the charge pulse supplied by semiconductor particle detectors 35 ('65) 93
Alberigi Quaranta, A., M.Martini, G. Ottaviani and G.Zanarini, On a new fast charge-sensitive preamplifier 32 ('65) 352
Alberigi Quaranta, A., M.Martini, G. Ottaviani and G.Zanarini, Preliminary results about the information available from rise-time of the pulses supplied by semiconductor detectors 34 ('65) 167
Allen, R., see Saulys 39 ('66) 335
Allkofer, O.C. und E.Kraft, Das Verhalten von Funkenkammern bei Triggerung aus der Primärionisation und aus der Lawine 36 ('65) 45
Alsmiller, Jr., R.G. and J.Barish, Calculation of the nuclear cascade in steel initiated by 10- and 19.2-GeV/c protons and comparison with experiment 36 ('65) 309
Alston, W.J. and J.E.Draper, A simple zero crossing discriminator 35 ('65) 155
Alton, G., see Manchester 38 ('65) 169
Alton, G.D., see Love 38 ('65) 87
Amadesi, P. and A.Cervellati, A method of analysis of rare gases released from nuclear fuel in U^{235} thermal fission 33 ('65) 45
Ambrosius-Olesen, P., O.W.Sørensen and K.M.Bisgård, Source preparation utilizing an h.f. field and a d.c. voltage 34 ('65) 255
Ammiraju, P., see Subrahmanyam 33 ('65) 87, 343
Amsel, G., Microanalysis using nuclear reactions induced by charged particles (not published)
Andersen, H.H. and P.Sigmund, Defect distributions in channeling experiments 38 ('65) 238
Andersen, J.U., J.A.Davies, K.O.Nielsen and S.L.Andersen, An experimental study of the orientation dependence of (p,γ) yields in monocrystalline aluminum 38 ('65) 210
Andersen, M.L., O.B.Nielsen and B. Scharff, Diffusion of rare earths through tantalum 38 ('65) 303
Andersen, S.L., see Andersen 38 ('65) 210
Andersen, T. and G.Sørensen, A preliminary report on chemical reactions with accelerated ions 38 ('65) 204
Andersson-Lindström, G. and B.Zausig, Silicon surface barrier detectors; fabrication, test methods, properties and some applications 40 ('66) 277
Andrade E Silva, J. et G.Lochak, Sur les accélérateurs à ions négatifs 36 ('65) 112
Antman, S.O.W., D.A.Landis and R.H. Pehl, Measurements of the Fano factor and the energy per hole-electron pair in germanium 40 ('66) 272
Antonini, B., N.Merzagora and G.Pauli, A slow neutron chopper for energies between 0.1 and 0.001 eV 33 ('65) 229
Arbel, A.F., Current operated nucleonic modules 32 ('65) 341
Armbruster, R., see Gorodetzky 38 ('65) 79
Armbruster, R., see Gorodetzky 40 ('66) 89
Arnison, G.T.J., A technique for producing deuterated polyethylene targets 40 ('66) 359
Arque Almaraz, H., An electrically controlled variable-gain pulse amplifier using different controlled elements 32 ('65) 283
Arque Almaraz, H., A temporary pulse-storage unit 33 ('65) 61
Asbury, J.G. and F.J.Loeffler, A scintillation telescope mass spectrometer for deuterons and protons with energies in the range 50 to 150 MeV 34 ('65) 284
Ascoli, S. and F.Cacace, The isotope separator of the Rome University and its application to the study of the chemical reactions of energetic ions 38 ('65) 198
Asghar, M. and F.D.Brooks, Neutron resonance scattering measurements with ^{6}Li glass detectors 39 ('66) 68
Ashton, F., R.B.Coats, B.Holyoak, D.A.Simpson and M.G.Thompson, Large area scintillation counters 37 ('65) 181
Aspelund, O., A general formalism for numerical evaluation of the polarization of fast-neutrons by means of finite-geometry measurements of the left-right ratio 40 ('66) 291

Aspelund, O., J. Björkman and G. Trumpy, An electromagnet for precession of the polarization of fast-neutrons 36 ('65) 245
Atkinson, J. and J.E. Sherwood, Neutron depolarisation effects in precession magnets 34 ('65) 137
Atoji, M., Multipurpose neutron-diffraction instrumentations 35 ('65) 13
Augustin, J.E., P. Marin et F. Rumpf, Traces et parcours d'électrons, muons et pions dans une chambre à étincelles à plaques épaisses 36 ('65) 213
Axtmann, R.C. and D. Kedem, The pulse height defect in semiconductor detectors 32 ('65) 70
Azimov, M.A., V.S. Pantujev and M.N. Khachaturyan, Investigation of a total absorption lead-glass Cherenkov γ-spectrometer in the energy range 0.25 - 4.0 GeV 39 ('66) 325

Baarli, J., K. Goebel and A.H. Sullivan, Part IV: Measurements of the penetration of a 10 and 19.2 GeV/c proton beam in steel using ionization chambers and plastic phosphors 32 ('65) 57
Bachelart, G. et G. De Rosny, Précision d'un intégrateur logarithmique 35 ('65) 55
Bächli, A. and K. Behringer, Time-of-flight module for the transistorized RCL 256 channel analyzer 32 ('65) 300
Bachtik, K.H., see Eckardt 35 ('65) 290
Bacon, D.F. and W.F. Nash, The spark tube 37 ('65) 43
Bacon, D.F. and W.F. Nash, Secondary discharges and current path splitting in divided electrode spark chambers 37 ('65) 61
Bagge, E., U.J. Roose and J. Trümper, A simple method of recording particle tracks in spark chambers 35 ('65) 345
Baierl, H., see Dehoust 40 ('66) 131
Bailey, R.L., see Love 38 ('65) 87
Baldinger, E. and A. Simmen, A reliable and versatile fast decimal scaler 33 ('65) 363

SUBJECT INDEX

Accelerators and Reactors

Residual radiation studies for meson factories, C.B.Fulmer, K.S.Toth and M.Barbier 31 ('64) 4
Semi-conductor probe for investigating accelerator beam pulses, H.E.Conzett, L.B.Robinson and R.N. Burger 10
Space charge limits and cyclotron beam enhancement, K.R.Mackenzie 13
Visual observation of beam profiles, D.M.Binnie, A.Duane, D.B.Miller, W.W.Neale, J.A.Newth, D.C. Potter and J.Walters 15
Bilan énergétique d'une décharge réflex, R.Basile et J.M.Lagrange 19
Zur vollständigen Herausführung des Elektronenstrahles aus einem Mikrotron. Kompensation magnetischer Störfelder, H.Reich und K.Löns 22
Particle trajectories in acceleration tubes, P.H.Rose, A.Galejs and L.Peck 26
High magnetic fields by the use of a mercury coil, E.Quercigh 27
A single cavity accelerator for 1 MeV protons, A.A.Glazov, V.A.Kochkin, D.L.Novikov and L.M.Onischenko 28
The time-energy response of NaI and CsI crystals to 14 MeV neutrons, G.D.Hickman and F.Hegedüs 32 ('65) 7
The energy spectrum of ion beam emitted by a Penning-type ion source, J.L.Nagy 22
A 250 kV Cockcroft-Walton voltage multiplier employing small selenium rectifiers and high frequency power-input, B.Mitra, H.N.Raha and B.Ghose 24
Theoretical analysis of the over-all characteristics of the power amplifier, r.f. cavity and accelerated beam in a synchrotron, C.H.M.Turner 24
Etude d'un tube pour accélérateur électrostatique à très fort débit, G.Burnot et J.Lafoucriere 28
Flux measurements of the new beam hole for the MTR velocity selector, R.M.Brugger 30
Design considerations for high-intensity negative ion sources, K.W.Ehlers 30
Injection of ions into a cyclotron from an external source, W.B.Powell and B.L.Reece 32
Ion optics of the accelerated tubes with non-uniform fields, P.Croitoru 33 ('65) 3
Zur Strombelastung der Beschleunigungsresonatoren, A.Paulin 5
The acceleration of doubly-ionized He^3, N.R.Roberson, D.R.Tilley and H.R.Weller 8
Absorption and generation of radio-frequency power in electron linear accelerator systems, J.Haimson 9
A slow neutron chopper for energies between 0.1 and 0.001 eV, B.Antonini, N.Merzagora and G.Pauli 22
Reactor pulsing in activation analysis, H.R.Lukens, Jr., H.P.Yule and V.P.Guinn 27
Utilization of reactor fast neutrons for activation analysis, H.P.Yule, H.R.Lukens, Jr. and V.P.Guinn 27
A neutron tube with constant output (10^{10} n/sec) for activation analysis and reactor applications, J.E. Bounden, P.D.Lomer and J.D.L.H.Wood 28
Automatic loading equipment for a reactor thermal column, I.Balla and G.Ben-David 30
Principe d'étude numérique d'un accélérateur linéaire, A.Chabert, A.Ferat et B.Veyron 34 ('65) 3
An improved system for energy modulation of particle accelerators, M.A.Wilson and M.L.Roush 54
A source of He^{++} ions for a Van de Graaff accelerator, I.J.Taylor and J.L.Weil 197
Effect of spot size on positron focusing systems, M.H.MacGregor 320
Etude d'une source d'ions à forte intensité et à rendement élevé, J.F.Bonnal, J.Giacomini, G.Mainfray, C.Manus et J.Morellec 328
Asymmetrical quadrupole lenses in a beam transport system, E.Koltay and Gy.Szabó 35 ('65) 88
A method for the measurement of total reaction cross-sections for charged particles, K.Bearpark, W.R. Graham and G.Jones 235
Extraction of negative hydrogen ions from a duoplasmatron ion source, L.E.Collins and R.H.Gobbett 277
Model of a rapid field inverter, H.Pflumm 317
The influence of magnetic and electric fringing fields on the trajectories of charged particles, H.Wollnik and H.Ewald 36 ('65) 93
Sur les accélérateurs à ions négatifs, J.Andrade E Silva et G.Lochak 112
Measurement of gamma heating in D.F.R., R.Dehn 141
A beam current integrator for pulsed positive ion accelerators, E.Blignaut and J.J.Kritzinger 176
Proposed methods for producing intense pulsed beams of mono-energetic neutrons, L.Grodzins, P.H. Rose and R.J.Van de Graaff 202
Use of the ferrous sulfate chemical dosimeter to determine the bremsstrahlung radiation intensity in the energy range 0.3 - 1 GeV, F.Salvetti, H.De Carvalho, V.Di Napoli and F.Dobici 241
A Hall effect stabilizer for experimental magnets, D.Grant, T.W.Jones and W.K.McFarlane 277
Low energy ion source in a magnetic field, T.Tsuchimoto 37 ('65) 135

PROCEEDINGS OF THE INTERNATIONAL CONFERENCE ON ELECTROMAGNETIC ISOTOPE SEPARATORS AND RELATED ION ACCELERATORS AND THEIR APPLICATION TO PHYSICS

I. Ion source theory and development 38 ('65) 1-47

VI. Applications to nuclear physics 277-32

D.R.Bès, Nuclear structure away from the region of β-stability (invited talk) 27
G.Rudstam, Project for an isotope separator on-line with the CERN synchro-cyclotron (invited talk) 28
R.Klapisch and R.Bernas, The detection of the short-lived lithium isotopes ^{8}Li and ^{9}Li by preliminary experiments with an on-line mass spectrometer 29
S.Borg, U.Fägerquist, G.Holm and F.Kropff, Experiences of on-line isotope separation of short-lived isotopes 29
G.Sidenius, R.M.Gammon, R.A.Naumann and T.D.Thomas, On-line separation of short-lived products from ^{252}Cf spontaneous fission 29
M.L.Andersen, O.B.Nielsen and B.Scharff, Diffusion of rare earths through tantalum 30
W.L.Talbert, Jr. and D.Thomas, Design considerations for a system to investigate short-lived nuclei produced at a reactor 30
O.B.Nielsen, Preparation of radioactive samples by isotope separation 31

B. Elbek, How nuclear reaction studies can profit from better samples of separated isotopes 314
R. A. Naumann and G. Sidenius, The isotope separator program at the Princeton-Pennsylvania accelerator 319

Electron bunching in traveling wave linear accelerators, J. Haimson 39 ('66) 13
Ein μsec-Impulsgenerator mit 10 MW Impulsleistung bei 200 kV Impulsspannung, J. Fronia und W. Heinz 58
Ein gepulster Injektor für grosse Ströme und Spannungen, W. Heinz 61
Polarized-proton scattering facility at the Oak Ridge isochronous cyclotron, L. N. Blumberg, E. E. Gross, A. Van der Woude and A. Zucker 125
H^-- und Li^--ionen aus einem Duoplasmatron, K. Bethge und G. Rau 157
A digital computer system for the executive control of a fast neutron laboratory, J. F. Whalen, R. Roge and A. B. Smith 185
Rayonnement synchrotron et observation des faisceaux dans un anneau de stockage, G. Di Giugno, J. Haissinski et P. Marin 217
A 5.5-MeV ion buncher of Mobley type, K. Tsukada, S. Tanaka, M. Maruyama and Y. Tomita 249
Some evidence on the electric dissociation of the negative hydrogen ion near 2.4 MeV/cm, T. A. Cahill, J. R. Richardson and J. W. Verba 278
Automatic-control-system design for the Berkeley 88-inch cyclotron, D. R. Struthers 321
Nanosecond pulse device for a 2 MeV Van de Graaff electron accelerator, O. Dehoust, H. Baierl and E. Hesse 40 ('66) 131
Mise au point d'une méthode d'étude numérique d'accélérateur linéaire. Application à l'étude de la focalisation par phase alternée, G. Teissier, A. Chabert et B. Veyron 197

Counters, Chambers and Detectors

A new particle identifier technique for $Z = 1$ and $Z = 2$ particles in the energy range > 10 MeV, F. S. Goulding, D. A. Landis, J. Cerny and R. H. Pehl 31 ('64) 1
Localization of sparks in spark chambers through magnetostrictive effects, G. Giannelli 29
Observation of particle trajectories in a wide gap spark chamber, W. R. Dawes, Jr. and R. M. Kalbach 41
Pulse shape discrimination, M. L. Roush, M. A. Wilson and W. F. Hornyak 112
A high efficiency detector for neutron capture cross section measurements, E. Haddad, R. B. Walton, S. J. Friesenhahn and W. M. Lopez 125
Shower efficiency of a spark chamber, V. N. Bolotov and M. I. Devishev 213
Calibration and performance of a neutron-time-of-flight detector, J. B. Czirr, D. R. Nygren and C. D. Zafiratos 226
Properties of a resonance scintillation counter, L. Levy, L. Mitrani and S. Ormandjiev 233
A solid state detector telescope with the facility of direction distinction, W. Mausberg and E. Rössle 245
Techniques for the fabrication of lithium drifted germanium gamma detectors, W. L. Hansen and B. V. Jarrett 301
Improved spectrum expander for semiconductor detector spectroscopy, M. Bertolaccini, C. Bussolati and S. Cova 32 ('65) 31
Recovery time and counting characteristics of a G. M. counter at higher intensities, J. H. Kramers 37
The pulse height defect in semiconductor detectors, R. C. Axtmann and D. Kedem 70
Geometrical optimization of interaction vertices in spark chamber analysis, B. Zacharov 163
Low-energy gamma-ray spectroscopy using an X-ray-escape gated proportional counter, P. G. Hansen, H. L. Nielsen, E. T. Williams and K. Wilsky 197
Une nouvelle méthode d'utilisation des cristaux de NaI(Tl) dans la détection de rayons γ de haute énergie, M. de Abreu et H. Nifenecker 204
Analyzing power of carbon for incident protons between 440 and 640 MeV, R. D. Eandi, R. W. Kenney and V. Z. Peterson 213
Decision-making spark chambers, Ch. Rey, S. Parker, B. Sherwood and D. Schwartz 217
Further topics in the design of angular distribution experiments, J. H. Williamson 235
Eine auf 0.2% genaue Zählung von Alphateilchen mit Plastikdetektoren, A. Spernol und O. Lerch 293
Totzeitfehler bei Differenz-Zählern, T. Friese 317
Der Einflusz von Geometrie und Füllung auf die Eigenschaften bromgelöschter Geiger-Müller-Zählrohre, K. Schwerd 347
Ein Szintillationszähler-Teleskop zur Untersuchung von (n, p)- und (n, d)-Reaktionen, K. Debertin, K. Hofmann und E. Rössle 33 ('65) 1
On the efficiency of the multiple wire-cavity spark counter for fast neutron detection, G. Singh and N. K. Saha 9
Fast multichannel neutron counting system, G. Palmieri and G. Ricco 120
Optimization of magnet trajectories in analysis of spark chamber data, B. Zacharov 136
Magnetostrictive readout for "wire spark chambers", V. Perez-Mendez and J. M. Pfab 141
Directional gamma ray detector for measuring high energy gamma rays from stars, D. Sadeh 147
Improvements in thermal neutron scintillation detectors for time-of-flight studies, L. A. Wraight, D. H. C. Harris and P. A. Egelstaff 181

N,N,N, trimethylborazine as a liquid scintillator solvent for thermal neutron detection, H.H.Ross and H.L.Holsopple 19
A gas proportional counter assembly for the study of (n,α) reactions, E.Kondaiah and U.T.Raheja 24
A pulse shape discriminator with a tunnel-diode zero-crosser, E.Nadav and B.Kaufman 28
On the behaviour of high resistivity Si surface barrier detectors, C.Bussolati, M.Bertolaccini and S.Cova 29
A fast fission product monitor, O.Strindehag 31
Influence de la couche morte des détecteurs à sémiconducteurs sur la précision des mesures d'énergie des particules α, G.Roux 32
A low background gas-flow counter assembly, M.N.Rao, J.K.Samuel and M.R.Ponkshe 34 ('65) 1
Fabrication of thin CsI(Tl) scintillation layers, G.Hrehuss and I.Borbély 3
Counter telescopes for the study of (n, charged particle) reactions, G.Paić, I.Šlaus and P.Tomaš 4
Uniform spectral sensitivity photon counter, A.M.Ghose 4
Die Beweglichkeit "heisser" Elektronen und ihr Einfluss auf die Anstiegszeit der Impulse von Halbleiterzählern aus n-Silizium, O.Meyer und H.J.Langmann 7
Gain versus temperature effects in NaI(Tl) photomultiplier scintillation detectors using 10 and 14 stage tubes, R.Erling Rohde 109
High pressure gas scintillation counters II, J.G.Jenkin and R.E.Shamu 116
Detector time jitter in He^3 and BF_3 proportional counters, O.K.Harling 141
Influence of non-constant carrier mobility on the charge transport time in semiconductor detectors, K. Falk, P.A.Tove and M.Madakbas 157
Energy dependence of pulse height defect with fission fragments in a silicon surface barrier detector, H.Kobayashi, A.Nakamoto and M.Hosoe 222
Performance of a Au-Si surface barrier diode as a beta ray detector - part II, D.R.Brundrit and S.K.Sen 225
A cryostat for semi-conductor gamma-ray detectors, C.Chasman and R.A.Ristinen 250
Pulse height defect for Al^{27} and Mg^{24} ions in silicon surface barrier detectors, P.G.Bizzeti, A.M.Bizzeti Sona, G.Di Caporiacco and M.Mangò 261
Isotropic discharge chamber filled with hydrogen and helium, V.I.Komarov and O.V.Savchenko 289
A polar flying spot scanner for the measurement of bubble chamber photographs, C.J.Robinson and M.J.B.Duff 35 ('65) 1
Collection time and equivalent circuit of surface barrier semiconductor detectors, G.Fabri and V.Svelto 83
On the information available from the rise-time of the charge pulse supplied by semiconductor particle detectors, A.Alberigi Quaranta, G.Casadei, M.Martini, G.Ottaviani and G.Zanarini 93
Analysis of kinematically constrained bubble chamber events, R.Handler 100
On the possibility of high energy particle detectors based on ultrasonic cavitation, M.Bertolotti, D.Sette and F.Wanderlingh 109
An externally quenched hydrogen counter for low level tritium measurements, T.Takahashi, T.Hamada and F.Yamasaki 120
Calculation of the detection efficiency of a cylindrical counter for X-rays from an internal source, J. Byrne 125
Totally depleted surface silicon detectors: construction and properties, G.Fabri and G.Redaelli 130
Détermination de l'énergie maximum d'un spectre de neutrons au moyen de la réaction sur le lithium et d'un seul détecteur semiconducteur, J.Libert 148
Track spark chamber with isotropic properties as a device to study high-energy nuclear interactions, G.E.Chikovani, V.N.Roinishvili, V.A.Mikhailov and A.K.Javrishvili 197
Large area Li^6I(Eu) detector bank for slow neutron time-of-flight measurements, A.Strub 203
Une chambre à diffusion de 36 cm précise à possibilités multiples, B.Delaunay, J.Delaunay, J.P.Meurgues et J.P.Passerieux 245
A method for pulse shape discrimination, R.Fülle, Gy.Máthé and D.Netzband 250
A liquid Čerenkov counter system for $K^{\pm}$ detection in the range of 0.60 to 2.0 GeV/c, S.Ozaki, J.J.Russell, E.J.Sacharidis and J.T.Reed 301
Das Verhalten von Funkenkammern bei Triggerung aus der Primärionisation und aus der Lawine, O.C. Allkofer und E.Kraft 36 ('65) 45
Finite solid angle attenuation factors in angular correlation functions, B.N.Subba Rao 59
Response of semiconductor surface barrier detectors to fission fragments, E.Konecny and K.Hetwer 61
Thermal-vacuum behavior of lithium-drifted silicon detectors, A.J.Tuzzolino, J.Kristoff and M.A.Perkins 73
A versatile two-element low-background flow-type beta-counter, G.Rajagopalan and D.Lal 105
A scattering chamber for charged particle work, R.W.Zurmühle 168
Chambres à étincelles circulaires à localisation électrique, M.Gouanere et L.Feuvrais 197
Traces et parcours d'électrons, muons et pions dans une chambre à étincelles à plaques épaisses, J.E. Augustin, P.Marin et F.Rumpf 213
A detector for neutral and charged particles, N.R.Daly, R.E.Powell and R.G.Ridley 226
Spark chamber using helium or hydrogen at high density, G.L.Schnurmacher 269
The optimisation of half-life counting experiments, I.S.Grant 289
Efficiency calculations for a circular detector viewing a circular radiator, J.Konijn, A.Lauber and B. Tollander 302
The design of a simple but accurate low energy beta liquid scintillation counter, E.Heiberg 314

Fast neutron bombardment of a lithium-drifted germanium gamma-ray detector, C. Chasman, K. W. Jones and R. A. Ristinen 37 ('65) 1
Etude de l'optique d'un détecteur d'ions à sensibilité indépendante de l'énergie, J. Brisse et C. Renaud 9
The spark tube, D. F. Bacon and W. F. Nash 43
Three-photon coincidence and lifetime apparatus for positronium in gases, J. Bell, G. J. Celitans, J. H. Green and S. J. Tao 51
Secondary discharges and current path splitting in divided electrode spark chambers, D. F. Bacon and W. F. Nash 61
Glass BF_3 proportional counters and their low temperature characteristics, A. G. Fenton and K. B. Fenton 83
Nouvelles possibilités des jonctions p-n de silicium dans la dosimétrie des particules nucléaires, D. Blanc, J. Casanovas, A.-M. Chapuis et G. Soudain 90
Calculated efficiencies of Ge(Li) detectors, H. P. Hotz, J. M. Mathiesen and J. P. Hurley 93
Pion studies with silicon detectors, M. R. Raju, H. Aceto and C. Richman 152
Energy dependence of a quantameter, I. Theory, T. Tomimasu, H. Sugiyama and Y. Ibaraki 194
Energy dependence of a quantameter, II. Experiment, T. Tomimasu, H. Sugiyama and S. Sugiyama 201
Stabilization of lithium-drifted silicon surface-barrier detectors, A. J. Tuzzolino, M. A. Perkins and J. Kristoff 204
Computer analysis of beta-ray and conversion-electron spectra observed with low-resolution detectors, P. C. Rogers and G. E. Gordon 259
Tritium concentration of German river waters measured with the proportional-counting technique, H. Von Buttlar, K. Farzine and H.-D. Wohlfahrt 288
On the background current in the dielectric liquid ionization chambers, M. Ladu, M. Pelliccioni and M. Roccella 318
Response of NaI, anthracene and plastic scintillators to electrons and the problems of detecting low energy electrons with scintillation counters, F. T. Porter, M. S. Freedman, F. Wagner, Jr. and I. S. Sherman 39 ('66) 35
Neutron resonance scattering measurements with ^6Li glass detectors, M. Asghar and F. D. Brooks 68
Eine auf 1% genaue absolute Zählung von X-Strahlen geringer Energie, W. Bambynek, O. Lerch und A. Spernol 104
Herstellung und Untersuchung von dicken basisfreien Oberflächen-Sperrschicht-Zählern, O. Meyer und H. J. Langmann 119
Measurement of high-energy γ-rays with Ge(Li) detectors, R. E. Berg and E. Kashy 169
The room scattered background produced by a neutron source in a laboratory with concrete walls, P. H. White 256
Low background beta detector for solid sample assay, V. E. Noshkin and E. DeAgazio 265
A programmed spot automatic scanning system for spark chambers, A. Saulys, D. I. Meyer and R. Allen 335
A nuclear reaction polarimeter using position-sensitive particle detectors, T. B. Clegg, A. C. L. Barnard and J. B. Swint 40 ('66) 45
Anlage zur Orts- und Energiebestimmung mit Halbleiter-Detektoren, W. R. Kuhlmann, K. H. Lauterjung und B. Schimmer 109
Eine Impulsdivisionsstufe, W. R. Kuhlmann und B. Schimmer 113
Ortsempfindliche Zählrohre, W. R. Kuhlmann, K. H. Lauterjung, B. Schimmer und K. Sistemich 118
The occurrence and measurement of accidental coincidences in experiments using pulsed accelerators, R. J. Griffiths, E. A. McClatchie, A. R. Johnston and W. R. Gibson 181
The measurement of the range-energy relation and straggling of α-particles in air using a solid state detector, E. Rotondi and K. W. Geiger 192
Evaluation of semiconductor detectors for fission fragment energy measurements, H. W. Schmitt and F. Pleasonton 204
Large volume lithium-drifted germanium gamma-ray detectors, H. J. Fiedler, L. B. Hughes, T. J. Kennett, W. V. Prestwich and B. J. Wall 229
Crystal density in supercooled radiation detector, V. K. Agarwal and N. K. Gilra 238
Calculated gamma ray photofractions for well-type scintillation detectors, B. J. Snyder and G. F. Knoll 261
Measurements of the Fano factor and the energy per hole-electron pair in germanium, S. O. W. Antman, D. A. Landis and R. H. Pehl 272
Silicon surface barrier detectors; fabrication, test methods, properties and some applications, G. Andersson-Lindström and B. Zausig 277
A general formalism for numerical evaluation of the polarization of fast-neutrons by means of finite-geometry measurements of the left-right ratio, O. Aspelund 291
Fabrication methods for lithium drifted surface barrier silicon detectors, H. M. Murray, J. W. Harpster and K. J. Casper 330

Instruments and Methods for High Energy Physics

Shielding studies in steel with 10 and 20 GeV/c protons 32 ('65) 45
Part I: General description of the experiment, J. Geibel, K. H. Reich and J. Seetzen 45
Part II: A study of the nuclear cascade in steel initiated by 19.2 GeV/c protons, A. Citron, L. Hoffmann, C. Passow, W. R. Nelson and M. Whitehead 48

Part III: Measurements of the nuclear cascade at 10 GeV/c with emulsions, R.L.Childers, C.D.Zerby, C.M.Fischer and R.H.Thomas 5
Part IV: Measurements of the penetration of a 10 and 19.2 GeV/c proton beam in steel using ionization chambers and plastic phosphors, J.Baarli, K.Goebel and A.H.Sullivan 5
Part V: Studies of the shielding required for the secondary radiation produced by a target in a high-energy proton beam, L.Hoffmann and A.H.Sullivan 6
Part VI: Monte Carlo calculation of the nucleon meson cascade in shielding materials, J.A.Geibel and J.Ranft 6
Calculation of the nuclear cascade in steel initiated by 10- and 19.2-GeV/c protons and comparison with experiment, R.G.Alsmiller, Jr. and J.Barish 36 ('65) 30
Observation of fission events in mica sandwiches, E.Cieslak, J.Piekarz, J.Zakrzewski, M.Dakowski, H.Piekarz and M.Sowinski 39 ('66) 22
Efficiency of secondary electron emission monitors for 70 MeV electrons, S.A.Blankenburg, J.K.Cobb and J.J.Muray 30
Investigation of a total absorption lead-glass Cherenkov γ-spectrometer in the energy range 0.25 - 4.0 GeV, M.A.Azimov, V.S.Pantujev and M.N.Khachaturyan 32

Instruments and Methods for Nuclear Spectroscopy

Prinzip eines magnetischen Compton-Spektrometers für Neutroneneinfang-γ-Strahlung, H.Daniel 31 ('64) 1
The spherical condenser as a high transmission particle spectrometer. III: Construction and calibration, H.H.Hubbell, Jr., W.J.McConnell and R.D.Birkhoff 1
Intensity, background and resolution width in nuclear counting experiments, G.Quittner 6
Fast delayed coincidence technique: The XP1020 photomultiplier and limits of resolving times due to scintillator characteristics, G.Present, A.Schwarzschild, I.Spirn and N.Wotherspoon 7
Ion optical effects of beam stabilization in a laboratory mass separator, J.H.Dijkstra and K.J.Van Oostrum 7
Fast neutron spectrum of Ra-Be source, B.B.Venkatapathi Raju and S.Jnanananda 8
Shape of the random sum photo-peak in scintillation spectrometry, A.Jasiński, J.Ludziejewski and J.Białkowski 9
Détermination de l'intensité de transitions γ de basse énergie par conversion externe, J.Oms et P.Chédin 9
The calibration of a NaI(Tl) scintillation spectrometer using a photon monochromator, J.F.Hague and R.E.Rand 15
Spectrum stabilization with variable reactance gain control, P.K.Patwardhan 16
A new broad range spectrometer with a uniform-field sectorial magnet and a preceding quadrupole-magnet doublet, K.Yagi 17
Circuits de coincidence et discriminateurs à transistors et diodes tunnel, M.Banner et J.Teiger 20
Correlation counting of coincident events, E.M.Friedländer 29
Resolution correction for an ideal magnetic beta-spectrometer, H.Paul 30
Lifetime measurements using a new method of beam pulsing, J.Dubois 32
A simple remotely-controlled target changer, J.T.Heinrich 33
Compact solid state high voltage supply, E.M.Sheen and C.A.Ratcliffe 33
A four-detector electron directional correlation spectrometer, P.Kleinheinz, L.Samuelsson, R.Vukanović and K.Siegbahn 32 ('65) 1
A tape storage system for use in low counting rate multichannel analysis, D.Segal, G.Ben-David and U.Galil 2
Construction and performances of silicon lithium drifted detectors, G.Bertolini, F.Cappellani and G.Restelli 8
A magnetic lens spectrometer for electron-gamma and electron-electron directional correlation measurements, W.L.Croft, B.-G.Pettersson and J.H.Hamilton 9
A simple instrument for α-spectrum analysis at various angles, A.Seidman 10
Ein schneller Impulshöhendiskriminator, H.Jung, M.Brüllmann und D.Meier 10
Automatische Mess- und Entmagnetisierungseinrichtung für das Siegbahn-Slätis Zwischenbild-Beta-Spektrometer, F.May 11
A high luminosity Compton spectrometer, G.Bosi 12
Internal conversion spectrometer using a semiconductor detector, R.C.Catura 15
Recherche de la dispersion et du stigmatisme pour un spectrographe magnétique utilisant un champ à symétrie de révolution en r^1, J.Riche 15
Resolution and luminosity of a triple axis crystal spectrometer in experiments of elastic neutron diffraction, G.Caglioti and D.Tocchetti 18
Einfluss der Quellendicke auf die gemessene β-γ-Richtungskorrelation, B.Martin und P.Schmidlin 21
Determination of α/β ratio for liquid helium, T.G.Miller 23
An internal conversion coefficient spectrometer utilizing semi-conductor detectors, H.T.Easterday, A.J.Haverfield and J.M.Hollander 33
A versatile n-He^3 coincidence system with improved He^3 resolution, R.A.I.Bell, N.G.Chapman and P.B.Johnson 33 ('65) 1
Spectrometer of charged particles emitted in reactions with fast neutrons, V.K.Voitovetskii, I.L.Korsunskii, A.I.Novikov, Yu.F.Pazhin and R.S.Silakov 1

Absolutmessung der radioaktiven Quellstärke nach der allgemeinen Koinzidenzmethode; Einfluss der Richtungskorrelation, Streukoinzidenzen und Summenimpulse, E. Kowalski 29
An anticoincidence shielded-multidimensional gamma-ray spectrometer, R. W. Perkins 71
A beta spectrometer using solid state detectors, J. Reynolds and B. Persson 77
An analytical method of analysing gamma-ray pulse height spectra, P. Subrahmanyam and P. Ammiraju 87
A method of correcting for "missed" resonances in neutron spectroscopy, T. Fuketa and J. A. Harvey 107
On the design of wide range electromagnets of high homogeneity, A. Huber and H. Primas 125
Carbon recoil detection and the response of organic scintillators in $C^{12}(n,n)C^{12}$ scattering, M. F. Steuer and B. E. Wenzel 131
Photoneutron spectrometry by time of flight, W. Bertozzi, P. T. Demos, S. Kowalski, F. R. Paolini, C. P. Sargent and W. Turchinetz 199
The curved-crystal spectrometer at the University of Michigan, J. J. Reidy and M. L. Wiedenbeck 213
Note on electron scattering and the ionization correction, H. Breuer 226
Effect of finite geometry on the energy distribution of registered particles in a thin radiator telescope, V. K. Voitovetskii, I. L. Korsunskii and Yu. F. Pazhin 245
The $V^{51}(p,n)Cr^{51}$ reaction as a neutron source of known intensity, K. K. Harris, H. A. Grench, R. G. Johnson and F. J. Vaughn 257
Shielding measurements on 4.8-GeV bremsstrahlung, G. Bathow, E. Freytag and K. Tesch 261
A pulse stretcher circuit for fast spectrometry, G. Venturello 268
The application of pulse-shape discrimination to separate phototube noise pulse from scintillation pulses, D. Landis and F. S. Goulding 303
An introduction to multichannel analyzers, G. S. Stanford 34 ('65) 1
A low threshold neutron detector for nanosecond time of flight spectrometry, J. M. Adams, E. Barnard, A. T. G. Ferguson, W. R. McMurray and I. J. Van Heerden 21
A thick target method for the measurement of differential neutron scattering cross-sections, E. Barnard, A. T. G. Ferguson, W. R. McMurray and I. J. Van Heerden 29
The influence of radon daughter concentration in air on gamma spectrometer background, F. C. Kloke, E. T. Smith and B. Kahn 61
A pulsed neutron source based on the Orbitron, L. Ruby and D. K. Wells 66
Photopeak efficiencies of NaI(Tl) crystals, R. M. Green and R. J. Finn 72
On the investigation of the adiabatic and nonadiabatic reversal of the thermal neutron spin, A. D. Gulko, S. S. Trostin and A. Hudoklin 88
Studies of beta spectra using a solid state spectrometer, P. Chăroenkwan 93
Comparison of the neutron yield from deuterided erbium and titanium targets, L. N. Large and H. Hill 100
Some observations on systems for automatic acquisition and reduction of nuclear data and a preliminary report on the computer system TRASK, S. Hultberg 125
Efficiencies of a coincidence spectrometer for positron annihilation radiation, M. L. Verheijke 132
Neutron depolarisation effects in precession magnets, J. Atkinson and J. E. Sherwood 137
The third-order aberrations in a broad range spectrometer with a uniform-field sectorial magnet and a preceding quadrupole-magnet doublet, K. Yagi 146
Special methods in the analysis of conversion electron spectra, A. A. Bartlett 181
Precise absolute intensity determination of neutron capture gamma rays, M. S. Popa and M. I. Cristu 192
Zeitauflösungseigenschaften von NaJ-Szintillatoren, J. Braunsfurth und H. J. Körner 202
Second order approximation of the three-dimensional trajectories of charged particles in deflecting electrostatic and magnetic fields, H. Wollnik 213
Automatic data recording station for the tandem Van de Graaff at Argonne, R. J. Pecina and F. J. Spokas 245
A fast, punched-card readout system for pulse-height analyzers, B. A. Euler, P. L. Phelps and D. F. Covell 266
A scintillation telescope mass spectrometer for deuterons and protons with energies in the range 50 to 150 MeV, J. G. Asbury and F. J. Loeffler 284
The measurement of fission fragment times of flight, W. F. Mruk 293
Velocity drive for Mössbauer experiments using an amplifier with negative output impedance, L. Lövborg 307
Interpolated energy distributions of Hg^{203} gamma rays scattered in sand, A. Schaarschmidt 325
Multipurpose neutron-diffraction instrumentations, M. Atoji 35 ('65) 13
A fast neutron spectrometer capable of nanosecond time gating, L. E. Beghian, S. Wilensky and W. R. Burrus 34
Sphere transmission method for the measurement of atomic photo-electric cross-sections, A. M. Ghose 45
Measurement of the finite angular resolution correction for a NaI(Tl) crystal when only the full-energy peak is included, C. W. Reich and J. H. Douglas 67
Discussion of factors affecting the absolute accuracy of Mössbauer *f* measurements, R. M. Housley 77
Réalisation de diodes n-i-p au germanium. Application à la spectrométrie γ, L. Stab, R. Henck, P. Siffert et A. Coche 113
Asymmetry in sum-coincidence spectra, R. A. Brown and K. I. Roulston 133
Neutrons from the deuteron bombardment of thick targets, R. R. Borchers and R. M. Wood 138
Spectres d'impulsions à "un photoélectron". I. Application à l'étude de l'origine du bruit de fond d'un photomultiplicateur, M. Duquesne et I. Tatischeff 181
Superpositions d'impulsions en spectrométrie gamma, R. Quivy 194
Time match of pulses and time resolution of a time-to-amplitude converter, S. J. Tao, J. Bell and J. H. Green 222

Source d'ions annulaire du type duoplasmatron, R. Becherer, A. Bariaud et F. Prevot 22
The organic scintillator as a 10 - 30 MeV neutron spectrometer, C. W. Lewis and J. M. Blair 26
Surface-escape corrections in "self-scintillation" measurements of beta spectra, M. L. Spaeth and G. B. Beard 27
Range-energy measurements in ORWO-K2-emulsions, A. Eckardt, K. H. Bachtik and G. Götz 29
A "leaky" integrator circuit with automatic switching, D. T. Birch and J. W. Nelson 29
Un magnétomètre de grande sensibilité avec des applications dans la spectroscopie magnétique nucléaire, I. Ringhiopol 30
Method for measuring total cross sections with neutrons having energies from 2.5 to 15 MeV, D. G. Foster, Jr. and D. W. Glasgow 36 ('65) 1
Improvement of resolution in large area photomultipliers, J. B. Mead and J. P. Martin 13
Computation of Mössbauer spectra, J. R. Gabriel and S. L. Ruby 23
Traitement sur ordinateur des spectres de rayons γ de capture obtenus à l'aide d'un cristal central associé à un cristal annulaire, V. D. Huynh, J. P. Meinadier, S. De Barros, J. Julien, G. Le Poittevin, J. Morgenstern, F. Netter et C. Samour 29
Effect of design parameters on the characteristics of Čerenkov's shower gamma-spectrometers, V. F. Grushin, R. A. Latypova and E. M. Leikin 40
An accurate determination of the neutron spectrum in the thermal column of the Triga-reactor FiR : 1, A. Palmgren 88
A new double focusing beta spectrometer, II, A. A. Bartlett and J. Keith 119
Performance and properties of a proton polarimeter, L. Drigo, C. Manduchi, G. C. Nardelli, M. T. Russo-Manduchi, G. Tornielli and G. Zannoni 153
Traitement optimum des informations spectrométriques par filtre adapté numérique, B. Escudie, M. Carriere et R. Chery 161
Choice of collimators for neutron powder diffractometry, M. Popovici 179
Direct-recording megachannel analyzer through associative programming of a small computer, B. Souček 181
Self-absorption and self-scattering effects in the beta particles sources, C. Oldano and A. Pasquarelli 192
Computer correction for shifts in gain and baseline in gamma-ray scintillation pulse height spectra, D. F. Covell 229
An improved strip sealed continuous rotation scattering chamber, R. A. Hawrylak, D. Cline and D. F. Grube 237
Internal conversion coefficients employing internal-external-conversion technique using a scintillation spectrometer, M. Raja Rao and S. Jnanananda 261
A motion device for Mössbauer spectrometry, C. A. Miller and J. H. Broadhurst 283
The correction factor for fast neutron reactions on sulfur and oxygen in the manganous-sulfate-bath calibration of neutron sources, W. M. Murphey 37 ('65) 13
Resolution corrections for β-ray spectra obtained with organic scintillators, D. D. Slavinskas, T. J. Kennett and W. V. Prestwich 36
The scintillation decay of some commercial organic scintillators, P. G. Sjölin 45
Directional anisotropy in the characteristics of the organic-crystal scintillators, II, K. Tsukada, S. Kikuchi and Y. Miyagawa 69
Apparatus for electron-gamma angular correlation measurements, A. Kukoč and L. Marinkov 77
On angular correlation measurements between fast neutrons, A. Ádám, Gy. Kozma and P. Quittner 98
Instrumental distortion of beta spectra measured in an intermediate-image spectrometer, H. Paul 109
Removal of second order neutrons by oriented single crystal filters, P. K. Iyengar, J. N. Soni, Q. O. Navarro, V. M. Pineda, M. G. Natera, T. C. Lee, Marsongkohadi, J. Song and T. Nimwanadon 121
A new gain stabilising system for scintillation spectrometers, A. M. Comunetti 125
Méthode expérimentale pour la mesure des sections efficaces de réactions nucléaires par spectrométrie de masse, R. Bernas, E. Gradsztajn, R. Klapisch, F. Yiou et Nguyen Long Den 141
Analysis of gamma-ray circular polarization with transmission magnets, R. B. Chesler 185
Electromagnetic isotope separator at Lublin, W. Żuk, D. Mączka and J. Pomorski 249
Spherical aberration of compound quadrupole lenses and systems, A. D. Dymnikov, T. Ya. Fishkova and S. Ya. Yavor 268
A multichannel spectrometer for the analysis of pulsed ion sources, L. Ruby, J. G. Kramasz, Jr., W. G. Pon and T. Vuletich 293
Neutron spectra from Am-α-Be and Ra-α-Be sources, M. N. Thompson and J. M. Taylor 305
Untersuchungen von d-d Reaktionen in Selbsttargets mit Deckschicht, G. Philipp und A. Hofmann 313
Theorie erster Ordnung eines Spektrometers hoher Dispersion mit wendelförmigem Magnetfeld, L. Tauscher, H. Daniel und F. Schmutzler 39 ('66) 1
An associated particle time of flight system for use with D-D neutrons, T. H. Hsu and J. M. Robson 8
Design of a 180° electron scattering facility, R. E. Rand 45
A method for calculations of the reduction of the resolution in a uniform-field magnetic analyzer system due to inhomogeneity of the magnetic field, K. Yagi 88
The muon and pion scattering in freon, M. Paty and H. Yoshiki 133
A γ-spectrum stabiliser with compensation for the effects of detector temperature variation, D. Williams, G. F. Snelling and J. Pickup 141
Particle optics inside an absorber, J. Banaigs, A. Citron, J. Fronteau, L. Goldzahl and J. Hornsby 150
A statistical model for photomultiplier single-electron statistics, J. R. Prescott 173

Gamma spectrometer systems employing an anti-Compton annulus, J. Kantele, O. J. Marttila and J. Hattula 194
Performance studies of the Phillips 56 AVP and XP 1020 photomultiplier tubes, K. W. Dolan, J. P. Hurley and J. M. Mathiesen 232
A simple method for the measurements of total neutron cross sections, E. Rössle and M. Tauber 261
On error propagation in the resolution correction, G. Quittner 271
Analog-to-digital converter nonlinearity due to the loss current, O. Szavits 293
Secondary electron trajectories in a Faraday cup magnetic field, J. S. Pruitt 329
The liquid dielectric ionization chamber as a means to study mixed radiation fields, M. Ladu and M. Pelliccioni 339
Backscattering of electrons from phosphors and a matrix method for correcting backscattering and resolution in scintillation beta spectrometers, P. Sen and A. P. Patro 40 ('66) 1
High-order double focusing in a magnetic field having the form $1/(r \sin \theta)$, A. Hofmann 13
Multiple spectrometer control by computer, D. R. Beaucage, M. A. Kelley, D. Ophir, S. Rankowitz, R. J. Spinrad and R. Van Norton 26
A Mössbauer spectrometer, M. Bornaz, G. Filoti, A. Gelberg, V. Grabari and C. Nistor 61
Energie und Kurzzeitauflösungsvermögen eines 1 m^2 Szintillationszählers, E. Böhm, U. J. Roose, R. Staubert und J. Trümper 73
On optical properties of the neutron crystal spectrometers, M. Popovici and D. Gelberg 77
Unscrambling of proton recoil spectra, B. Brunfelter, J. Kockum and H.-O. Zetterström 84
A liquid helium, time-of-flight coincidence neutron polarimeter, T. G. Miller 93
A computer program for the analysis of time-of-flight spectra, J. W. Tepel 100
A small neutron diffractometer, E. Tunkelo and J. Kajamaa 125
The production of radioactive sources by the electrospraying method, P. S. Robinson 136
Influence de l'autoabsorption sur les mesures absolues de la fraction Mössbauer, S. Lejeune 141
A coincidence method for studies of internal pair formation from the annihilation radiation, E. Spring 146
Monokinetic neutron beam in the range of 50 to 150 MeV, D. F. Measday 213
A fast neutron spectrometric technique, D. R. Koehler and J. T. Grissom 235
Apparatus for measuring spectra of radioisotopes with half-lives from one second down to a millisecond, R. S. Bender, I. R. Williams and K. S. Toth 241
Nuclear spectroscopy measurements employing modulation of target potential, J. M. Morris and T. R. Ophel 245
A note on the resolution of two-component decay curves: The intercept method, K. F. Chackett 254
Peak/total-ratios for NaI(Tl)-crystals, H. Leutz, G. Schulz and L. Van Gelderen 257
Multi-ion source electromagnetic isotope separator, B. Dunjić 309
A comparative study of semi-conductor gamma spectrometers for scanning of irradiated Dragon fuel elements, H. Hick 337

Nuclear Electronics

Utilisation des diodes à recouvrement brusque, R. Van Zurk 31 ('64) 68
The design of experiments using compiler language computer programs, J. V. Kane 83
Schnelle Koinzidenzstufe mit Lawinentransistoren, W. Michaelis, H. Schmidt und C. Weitkamp 93
A method of fast data transfer over telephone lines, R. A. McNaught 106
Two-parameter analyzer and other use of the digital computer in a nuclear laboratory, A. C. L. Barnard, R. Keyes, J. A. Buchanan, T. A. Rabson and G. C. Phillips 147
Ensemble de coincidence rapide à résolution variable 1.5 ns à 150 ns, Ch. Mantakas 189
A transistorized, frequency modulated proton magnetic resonance system for the measurement and control of magnetic fields, W. C. Olsen 237
Overloading eliminator for linear amplifiers, C. Lascaris and L. Papadopoulos 250
A charged particle identification system with broad energy range, L. W. Swenson 269
An automatic gain stabilizer for scintillation counters, J. L. Black and E. Valentine 325
Non-periodic high speed pulsers, R. F. Rumphorst 329
A hybrid preamplifier for cooled lithium ion-drifted semiconductor detectors, T. W. Nybakken and V. Vali 32 ('65) 121
A single valued time to pulse height converter using tunnel diodes, H. Weisberg 133
A pile-up elimination circuit, H. Weisberg 138
A logarithmic converter for nuclear pulses, T. Hiramoto 141
Transistor biased amplifier utilizing current switching techniques, R. N. Larsen 147
Tunnel diode time marker circuit for use with scintillation counters, R. N. Larsen and E. B. Shera 168
Ein einfacher Zeit-zu-Impulshöhe-Konverter für Stoppsignalfrequenzen von 3 - 40 MHz, W. Schweimer 190
A digital gain stabilizer for a multiparameter pulse-height-recording system, M. Nakamura and R. L. La Pierre 277
An electrically controlled variable-gain pulse amplifier using different controlled elements, H. Arque Almaraz 283
Time-of-flight module for the transistorized RCL 256 channel analyzer, A. Bächli and K. Behringer 300
A fast wide range single channel pulse height analyzer, H. Brafman 321
A triple subnanosecond pulse generator with avalanche transistors and charge-storage diodes, D. Iveković 339
Current operated nucleonic modules, A. F. Arbel 341

Synchronization of pulses to the phase of a 20 MHz sine wave, A. Langsford, P.E. Dolley and G.B. Huxtable 33 ('65)
A temporary pulse-storage unit, H. Arque Almaraz 1
A fast pulse train generator, B. Righini 2
A new type of linear ratemeter and output stage, J. Zadicario, J. Grünberg and U. Sold 2
A transistorized linear gate for use with a double grid ionization chamber, A. Sasaki and M. Tsukuda 2
A wide band, d.c. coupled, fast amplifier, M. Coli, S. Lupini, V. Silvestrini and G. Penso 2
An analogue ratio circuit for fission fragment mass determination, G.R. Hogg and K.H. Lokan 3
A 500 Mc twisted ring counter whose resolution is limited by gate switching speed only, W. Hilberg 3
A new scale of two circuit, A.J. Oxley 3
Filmless automatic processing of nuclear tracks using standard equipment, A. Seidman 34 ('65)
Ein transistorisiertes stabilisiertes Hochspannungsnetzgerät 650 - 3000 V, 10 mA, zur Speisung von Photomultipliern, L. Frevert und W.D. Kreisel 6
A digital decimal pulse ratemeter, M. Werner 10
Low-background preamplifier-amplifier system for proportional counters, F. May and F. Semturs 12
A novel fast scale-of-five circuit and its applications, S. Sinman 15
A time-to-amplitude converter for use with a pulsed accelerator, D. Maydan 22
A new bilateral fast linear gate circuit, M. Coli and S. Lupini 23
A fast wide range time to height converter, H. Brafman 23
A fast, solid state, pulse amplitude divider and multiplier, J. Grunberg, U. Sold and U. Galil 31
Précision d'un intégrateur logarithmique, G. Bachelart et G. De Rosny 35 ('65) 5
Possibilité d'amélioration du rapport signal/bruit, par correlation dans une expérience d'identification de particules, B. Escudie et R. Chery 10
Particle discrimination system for nuclear reaction studies, J. Mailen Kootsey 14
Construction and performance of a fast time-to-amplitude converter, J. Bell, S.J. Tao and J.H. Green 21
A high stability amplifier for nuclear physics applications, B. Collinge, C. West and G.H. Lloyd 31
Analysis of some circuits used in amplifiers for semiconductor nuclear particle detectors, D.N. Poenaru, and N. Vîlcov 36 ('65) 5
Operation of a transistor in saturation state and a linear gate, L. Papadopoulos 12
A tunnel diode discriminator with fixed dead time, J.M. Diamond 29
Transistorized time-to-amplitude converter, G. Jones and W.R. Falk 37 ('65) 2
An event gate module for spark chamber experiments, S.J. Rudnick and A.J. Metz 2
A transistorized linear gate, E. Elad and S. Rozen 5
Recording of simultaneous multi-detector neutron decay curves, J. Carmeliet and Ph. Kinet 10
Data logging used on a proton linear accelerator and a description of the analogue to digital converter used, U. Kracht 23
A versatile routing system for multichannel analyzers, J. Kantele and T. Kohonen 26
Considérations sur le bruit de l'étage d'entrée d'un amplificateur d'impulsions, J.C. Balland, J. Pigneret, J.-J. Samueli et A. Sarazin 27
A fast coincidence system for low energy γ-ray spectroscopy, M. Bertolaccini, S. Cova and C. Bussolati 29
A tunnel diode cascade circuit, H. Verweij 30
A random pulse generator, B. Divon (Wolfovich) and S. Rozen 39 ('66) 7
Pile-up effects in time measurements, I. De Lotto and D. Dotti 28
Sensitive, 100 MHz pulse discriminator and shaping circuit, M. Coli 29
Synthesis of an optimum filter for timing scintillation pulses, E. Gatti and V. Svelto 30
Ein Impulsgenerator zur Einstellung und Prüfung von Koinzidenzanordnungen mit Nulldurchgangstriggerschaltungen, P. Seyfried und S. Deike 31
Kernresonanz-Magnetometer mit Frequenzvervielfachung, R. Reimann und H. Eggensberger 40 ('66) 9
Optimum energy resolution of semiconductor radiation detectors with preamplifiers using tubes, field-effect transistors and bipolar transistors, H.R. Bilger 54
Das digitale Registriersystem des Luftschauerexperiments in Kiel, E. Böhm, U.J. Roose, R. Staubert und J. Trümper 67
Monostable à durée multiple, S. Gorodetzky, J. Zen, J. Ruscher, A. Muser et R. Armbruster 89
Variable width pulse generator using avalanche transistors and charge-storage diodes, H.J. Fraser 106
A pattern generator, J. Kontos 121
A solid-state low-noise preamplifier, D.O. Hansen and N.L. Roy 20
Caractéristiques d'un spectromètre de temps de vol comportant un convertisseur temps-amplitude à semi-conducteurs, J.L. Irigaray, J. Roturier et G.Y. Petit 22
On transfer characteristic of logarithmic amplifier, L.S. Horn and B.I. Khasanov 267
Verstärkungsänderungen bei Photovervielfachern vom Typ Valvo 56 AVP, H. Schneider und C. Weingardt 305
Univibrator as a time base element in a medium fast coincidence circuit, H. Halling and F. May 325

Miscellaneous

A micro-evaporation source heated by electron bombardment and its utilization for target preparation in nuclear physics, W. Menti, M. Martin, E.B. Bas and O. Vogt 31 ('64) 25
Some aspects of least-square analysis of particle tracks with orthogonal polynomials, Y.S. Kim 35

Untersuchung des spurious scattering in NIKFI-R-Kernemulsionen, U. Krecker 55
A simple method for the measurement of magnetic field indices, J. Camplan and R. Meunier 192
Untersuchung von Verzerrungen in NIKFI-R-Emulsionen, III: Einflusz einer feucht-warmen Behandlung vor der Bestrahlung, I. Hauser und U. Krecker 217
A study of weighing techniques used in radionuclide standardization, P. J. Campion, J. W. G. Dale and A. Williams 253
On measurements of disintegration rates of radioactive sources by coincidence methods, I. S. Panasyuk 314
Efficiency of ionization measurements in nuclear emulsions, J. Cohen 317
A tabulation of the Doppler integrals $\Psi(x,t)$ and $\Phi(x,t)$, K. K. Seth and R. H. Tabony 333
Graphite supporting films for thin source and target preparation, V. E. Viola, Jr. and D. J. O'Connell 32 ('65) 125
Routine mass-thickness and nonuniformity determinations of thin films, K. F. Wylie and G. R. Hagee 201
Precision mass spectrometric isotope dilution analysis, P. J. De Bièvre and G. H. Debus 224
A method of analysis of rare gases released from nuclear fuel in U^{235} thermal fission, P. Amadesi and A. Cervellati 33 ('65) 45
The magnetic potential of axially symmetric fields, G. Bosi 68
Tape-wound magnet coils, R. L. Kustom and G. E. Yurka 309
Method of effective counts for combining experimental results, F. S. Crawford, Jr. 332
Design of equipment for rapid handling of irradiated solutions, C. E. Bemis, Jr. and J. W. Irvine, Jr. 34 ('65) 57
A general program for statistical analysis using the maximum-likelihood method. "Malik" program, F. Grard 242
Determination of the properties of delay-line coaxial cables, W. F. Mruk 35 ('65) 61
An automatic sample changer for liquid samples, J. Legal, J. P. Mamacos, E. Cartwright and A. F. Holloway 72
Measurement of the thickness of thin foils, M. A. Farouk, M. H. Nassef, A. Z. El-Behay and I. I. Zaloubovsky 210
Sur l'obtention des champs magnétiques uniformes utilisés en spectrographie β à haute résolution, P. Paris et G. Seige 242
A digitized microscope for scanning nuclear research emulsions, P. W. Benjamin and G. S. Nicholls 283
Calculated tissue current-to-dose conversion factors for nucleons below 400 MeV, C. D. Zerby and W. E. Kinney 36 ('65) 125
Molecular plating, IV. A rapid method for the electrodeposition of plutonium, N. Getoff and H. Bildstein 173
An electromagnet for procession of the polarization of fast-neutrons, O. Aspelund, J. Björkman and G. Trumpy 245
A fresh approach to readout counting systems, G. A. McGinnis, R. J. Pecina and L. L. Prucha 255
Etude théorique de l'extraction d'un signal périodique dans un bruit par accumulation de données, G. Bonnet 37 ('65) 217
Kinematic relations in reactions of the form $A+B \rightarrow C+D+E$, G. G. Ohlsen 240
Radiological search instrumentation - Trieste I, E. J. Wesley and R. L. Hopton 281
Absolutmessung der radioaktiven Quellstärke nach der allgemeinen Koinzidenzmethode; Koinzidenzen zwischen zwei Strahlungsgruppen, Diskussion der Totzeiteffekte, E. Kowalski 39 ('66) 93
Digital speed and phase control system for three-rotor type neutron choppers, E. Ohno and T. Kawabata 109
On unfolding an apparatus function from data of low statistical accuracy, J. McL. Emmerson 163
Améliorations apportées aux chronomètres à vernier (verniers chronotrons), J. Thenard et G. Victor 40 ('66) 318

Letters to the Editor

Über einige Eigenschaften Retina-artiger Zähler, K. O. Thielheim 31 ('64) 341
A self-triggering spark chamber, S. Yasumi, H. Itoh, A. Masaike and K. Miyake 343
The digital reactor period meter, C. H. Vincent 345
Statistical problem in pulse shape discrimination technique, Y. Takami and M. Hosoe 347
Portes logiques rapides pour la fonction "et", D. Maeder 349
A compact duoplasmatron ion source using a ferrite permanent magnet, H. Tawara, S. Suganomata and S. Suematsu 353
Equipment for electrospraying, V. Verdingh and K. F. Lauer 355
Two-dimensional time analyzer suitable for life-time measurements in the nanosecond range, M. Bonitz, P. Winkler and R. Kästner 357
DRIFT - A drift-correcting computer subroutine for nuclear spectroscopy, P. Paatero 360
Low-rate proton bombardment of diffused silicon counters, R. E. Scott 32 ('65) 171
Flat response to neutrons between 20 keV and 14 MeV of a BF_3 counter in a spherical hollow moderator, M. Ladu, M. Pelliccioni and E. Rotondi 173
Statistical behaviour of systems with variable dead-time, I. De Lotto and P. F. Manfredi 175
Step generator with rise time $\leq$150 picosec, J. Oleson and P. W. Keaton, Jr. 177
On a new fast charge-sensitive preamplifier, A. Alberigi Quaranta, M. Martini, G. Ottaviani and G. Zanarini 352
An SCR fast-latching gate circuit, H. Janzen and P. J. Scanlon 353
Improvements of electrospraying technique, G. Bertolini, G. De Pasquali and R. Fantechi 355
Direct extraction of negative ion beams of good intensity from a duoplasmatron, G. P. Lawrence, R. K. Beauchamp and J. L. McKibben 357
A cryostat for germanium detectors, J. Lippert 360

A nanosecond pulsing system in use with a Van de Graaff-accelerator, L. Beckman, R. B. Jansson and B. L. Nilsson 33 ('65) 15
Analytical determination of the longitudinal geometry of a standing-wave linear accelerator, A. Chabert and B. Veyron 15
Fused $Li_2^6CO_3$ for absorbing slow neutrons in collimating systems, B. M. Rustad, C. J. Christensen and B. Skytte Jensen 15
Non-integrating stretcher for pulses of 6 to 300 ns length, C. Weddigen and E. L. Haase 15
A simple way to get a parabolic energy response in a grey wedge gamma-spectrometer, H. Grüter 15
A 1 ns risetime amplifier with direct coupling, H. G. Jackson 16
Ein rauscharmer ladungsempfindlicher Vorverstärker mit Feld-Effekt-Transistoren, O. Meyer 16
Une source d'ions lithium, P. Bretonneau et M. Dumail 16
A gasflow counter with variable sensitive area for low-level beta counting, H. Erbe 16
The depletion depth of lithium-ion drift detectors as a function of the time, voltage and the diffusion coefficient, J. Takacs 17
Registration of charged particles emerging in gas of a spark chamber with large gap between the electrodes, Yu. V. Galaktionov, V. A. Lyubimov and F. A. Pavlovsky 173
Beam current integration of heavy ion projectiles, H. M. Loebenstein, D. W. Mingay and C. S. Zaidins 175
Nanosecond lifetime measurements with a fast gaseous counter, A. Krusche, D. Bloess and F. Münnich 177
Preparation of silver and gold photo-electric strip-converters for use in beta spectroscopy, M. Af Ugglas 335
Sur une méthode d'injection de particules polarisées dans un cyclotron ou un synchrocyclotron, R. Beurtey et J. Thirion 338
Über die Erprobung eines steuerbaren Kurzzeit-Photovervielfachers SKP-1, S. V. Muchin, H.-J. Pohl, S. V. Richwizky, I. N. Semenyuskin und I. Foltin 339
Radiation damage of Mylar and H-film, A. M. Koehler, D. F. Measday and D. H. Morrill 341
A simple non-interrupting method of measuring pulsed electron beam current in low energy electron LINAC, P. Subrahmanyam and P. Ammiraju 343
A random time generator for timesorter linearity measurements, W. Falk, G. Jones and R. Orth 345
A Compton-rejection germanium spectrometer, Y. Sever and J. Lippert 347
The reaction $B^{11}(p,\gamma)C^{12}$ at the 163 keV resonance as a source of 11.7 and 16.1 MeV gamma rays, F. Cvelbar, A. Hudoklin and M. Potokar 349
A third order axial focusing in a current sheet type $\pi\sqrt{2}$ spectrometer, M. Fujioka 351
Investigation of fluctuations in measurement of particles ionization power in a spark chamber, Yu. V. Galaktionov, F. A. Yech and V. A. Lyubimov 353
The conditions of spark discharge emergence in a large gap spark chamber, V. A. Lyubimov and I. V. Sidorov 355
Memory time for a spark chamber with large gap between electrodes, filled with pure neon, V. A. Lyubimov and I. V. Sidorov 356
A method of correcting for accidental coincidences, W. R. Gibson, A. R. Johnston, R. J. Griffiths and E. A. McClatchie 357
L'amélioration du pouvoir de résolution en énergie des scintillateurs gazeux sous faible pression par application d'un champ électrique uniforme, J. L. Teyssier, D. Blanc et H. Brunet 359
A new fast neutron detector, C. West 361
A reliable and versatile fast decimal scaler, E. Baldinger and A. Simmen 363
Preparation of thin silicon targets by reductive evaporation, I. Berecz, J. Károlyi and A. Szalay 364
A new method of track recording of spark chamber on magnetic thin films, R. Kajikawa, K. Kikuchi, H. Kobayakawa, F. Makino, A. Masaike and Y. Ōhashi 365
An ionization current integrator and its application to the measurement of the energy dependence of the Cornell thick-walled ionization chamber, Th. W. Aitken 34 ('65) 160
Isotopic analysis of uranium using an internal standard, R. G. Ridley, N. R. Daly and M. H. Dean 163
Direct recording of particle tracks of spark chamber on X-ray films, R. Kajikawa, K. Kikuchi, F. Makino, A. Masaike, Y. Ōhashi and K. Yokoi 165
Preliminary results about the information available from rise-time of the pulses supplied by semiconductor detectors, A. Alberigi Quaranta, M. Martini, G. Ottaviani and G. Zanarini 167
Improved pulse shape discriminator, R. Bass, W. Kessel and G. Majoni 169
On the accuracy of the calibration techniques used with semiconductor detectors, F. E. Emery and T. A. Rabson 171
On the relation between beam current and dee voltage in a cyclotron, J. D. Lawson 173
Lumped delay line spark chamber, G. F. Bertsch 175
Mixed radiation field measurement by means of ionization chambers filled with dielectric liquids, M. Ladu, M. Pelliccioni and M. Roccella 178
Simple improvement of NMR-signals for magnetic field measurements, V. Dose 253
Source preparation utilizing an h.f. field and a d.c. voltage, P. Ambrosius-Olesen, O. W. Sørensen and K. M. Bisgård 255
Using the overlap of pulses to determine the pulse height spectrum, A. E. Johnsrud 258
Motion of charged particles in axially symmetric electromagnetic fields with a median plane, S. Ya. Yavor 341
Suivage automatique de traces dans les émulsions nucléaires, A. Bernheim, G. Doriot, J. C. Fayolle, J. P. Vedel et M. Morand 345

A self triggering projection discharge chamber, R.Giacomich and M.Lagonegro 347
A wide-range radiation monitor, E.Tagliaferri, D.Hansen and C.York 349
An accurate method for measuring energies and flight directions of neutral pions, L.Tau 352
Loss of protons by nuclear interactions in sodium iodide crystals, D.F.Measday 353
Air scattering in neutron capture cross section measurements, J.C.Robertson and T.B.Ryves 35 ('65) 153
A simple zero crossing discriminator, W.J.Alston and J.E.Draper 155
Study on the facing-coupled Esaki diode pair, Y.Murata 158
Backscattering of electrons in an electrostatic energy analyzer, J.Kessler and N.Weichert 161
Modification of the Laben 512-channel analyser for multiparameter experiments, N.Gangas, V.Katselis and S.Kossionides 163
Method for vacuum deposition of cobalt metal films using graphite crucibles, A.Rose 165
Angular errors in spark chamber tracks due to spark pairing, B.G.Duff, F.F.Heymann, R.N.F.Walker and J.A.Strong 167
A fast method to determine the trajectory of charged particles, S.Ozaki 169
$\frac{1}{2}\pi\sqrt{13}$ high-precision beta-ray spectrometer, H.Daniel, P.Jahn, M.Kuntze and G.Spannagel 171
A transistorized device correcting for time-of-flight errors introduced by two layer counters, J.Eder, D.Roebbelen and A.Strub 173
Focusing properties of azimuth-dependent magnetic fields, F.Schmutzler, H.Daniel and L.Tauscher 176
Fallout concentrations of some radionuclides from 1963 through 1964, M.De Bortoli, P.Gaglione and A. Malvicini 177
Range-momentum curves for heavy low velocity ions in nuclear emulsions, A.Lou 321
A new readout and memory method for a multiwire spark chamber, S.Miyamoto 323
Measurement of tube parameters and their influence on resolution of preamplifiers used with semiconductor particle detectors, E.A.Leventhal 325
Cancellation of photomultiplier gain drift following source intensity change, J.E.Brimhall and L.A.Page 328
A Ge(Li) gamma ray spectrometer, R.J.Fox, I.R.Williams and K.S.Toth 331
The polar scanner, C.J.Robinson and M.J.B.Duff 334
L'analyse bi-paramétrique de correlation amplitude-amplitude et l'identification des cascades γ de désintegration, Ph.Sarquiz 337
A beta proportional counter with a plastic anti-coincidence shielding as a low background assembly, M.V. Ramaniah, C.L.Rao and J.K.Samuel 339
A scaler printout system, A.Barna and D.Horelick 341
A simple method of recording particle tracks in spark chambers, E.Bagge, U.J.Roose and J.Trümper 345
A large CO_2-filled proportional counter with reduced sensitivity to electron attachment, B.Cleyet 346
A dE/dx-E-T particle identification system, E.R.Parkinson and D.Bodansky 347
A trigger tube reversible binary scaler, A.J.Oxley 350
The preparation of oxide films of protactinium, tantalum and niobium on platinum, M.G.Brown, S.J.Lyle and G.R.Martin 353
A method of measuring thermal neutron decay, K.-H.Müller 355
Observation of vertex events in a wide-gap spark chamber, R.C.Catura and K.W.Chen 36 ('65) 317

NORTH-HOLLAND BOOKS

*the slowing down and thermalization of neutrons

Just out

by M. M. R. WILLIAMS, Nuclear Engineering Department, Queen Mary College, London

598 pages 6 × 9″ f 60.–; 120 s.

The subject of neutron thermalization has, during the past ten years, developed from a collection of rather dubious "working recipes" into a fully developed branch of physics.

Today, the basic physics of the slowing down and thermalization of neutrons in matter is well known. With few exceptions, adequate scattering models of all the common moderators are known, and most of the basic experiments can be explained in terms of these models. The mathematical development of the Boltzmann equation has also developed rapidly and our understanding of the eigenvalue spectrum of this equation is now quite comprehensive.

All of these problems are extensively and systematically discussed in this book.

Contents

Part I. **The thermal energy region**

1 Introduction and historical review
2 The scattering kernel
3 Neutron thermalization in an infinite homogeneous medium
4 Neutron thermalization in finite media
5 The spatial dependence of the energy spectrum
6 Reactor cell calculations
7 Synthetic scattering kernels

Part II. **The slowing down region**

8 Scattering kernels in the slowing down region
9 Neutron slowing down in an infinite homogeneous medium
10 Neutron slowing down and diffusion

Theory of Cyclic Accelerators

by **A. A. KOLOMENSKY** and **A. N. LEBEDEV**

This book, which has been translated from the Russian by Dr. M. Barbier of CERN, Geneva, contains a systematic development of the general theory of modern accelerators, as well as a description of the features of devices of various types. Besides the theoretical principles, the most important practical questions are examined along with the methods of computing parameters and tolerances. Particular attention is paid to the work accomplished in recent years and devoted to the attainment of the highest values of energy and intensity of accelerated particles. Strong focusing accelerators, radiative effects, problems of particles storage are considered in detail.

CONTENTS

1 Betatron oscillations of particles in ideal periodic magnetic systems
2 Betatron oscillations of particles in non-ideal magnetic systems
3 Synchrotron oscillations
4 Radiation effects in cyclic electron accelerators
5 Loss of particles caused by random perturbations of the motion
6 Peculiarities of accelerators of various types.
Appendices, References

6x9″ **419 pages** ***f* 48.-; 96s.**
